

list of equipments confirmed a connection with SmartCS/SmartCSmini

SEIKO SOLUTIONS INC.

Date Modified: 2016/11/28

The following are the lists of cables/connectors and monitored equipments we confirmed a connection with SmartCS.
Mark "*" are recently added.

Please note the list is just for your reference, and we recommend to confirm the wiring of monitored equipments before using.

- *1 Our customers confirmed
- *2 Refer to the sheet "special cable and connector"
- *3 Auto baud rate setting may cause the data corruption/error.
Please fix the baud rate.

Network Equipment

maker	product	baud rate (Default)	console form	connection cable	result	supplement
A10 Networks	AX1000	9600bps	RJ45	ethernet cable(special cable)	OK	*2 special cable2
	AX3400	9600bps	RJ45	ethernet cable(special cable)	OK	*2 special cable2

【Document1】Cable and connector to connect NS-2250 with target equipments.

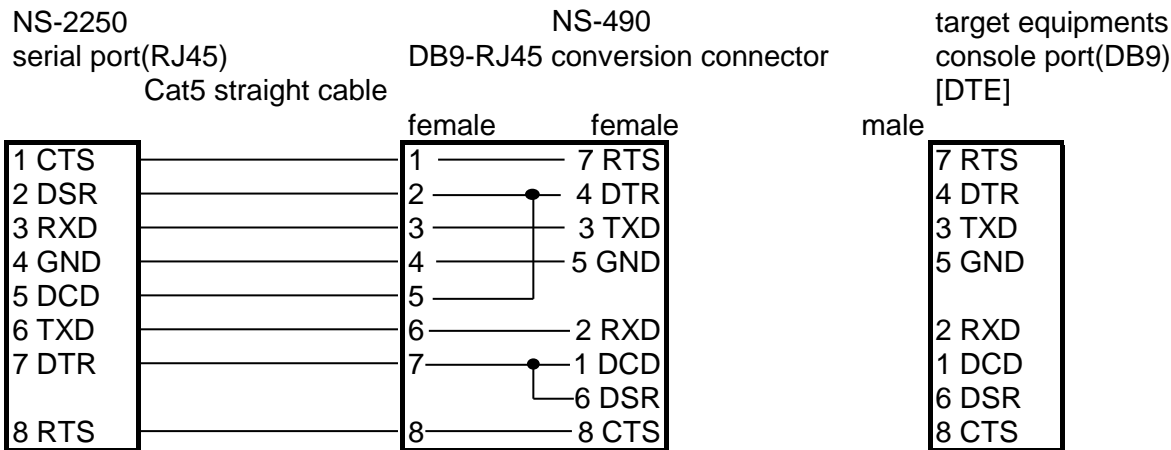

case of RJ-45 port(use Cat5 straight cable)

In the case of connecting NS-2250 with equipments using RJ-45 port as the console port, please use Cat5 straight cable.
Depending on a pin assignment of target equipments, you can't use Cat5 straight cable sometimes.
Please confirm the wire connection referring a manual of target equipments.

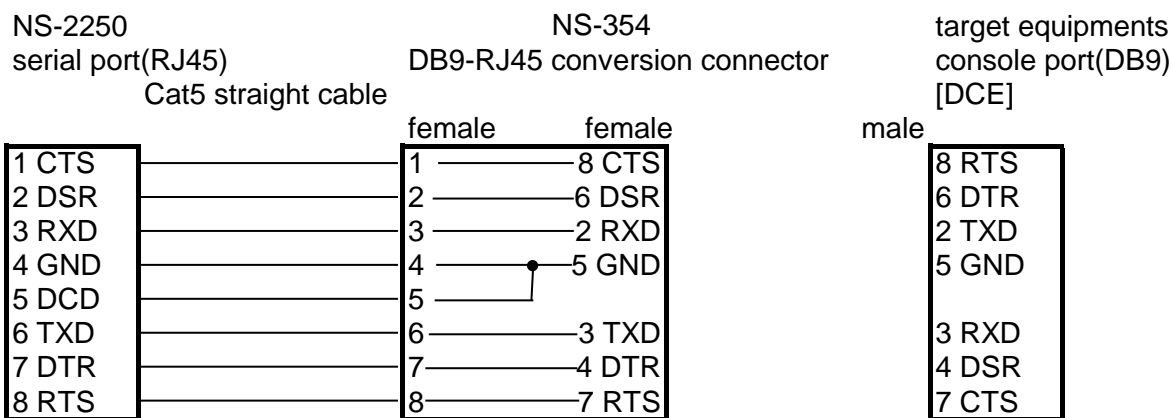

case of DB9[DTE](use Cat5 straight cable and NS-490 connector)

In the case of connecting NS-2250 with equipments using DB9[DTE] port as the console port, please use Cat5 straight cable and NS-490 connector.
Depending on a pin assignment of target equipments, you can't use the above combination sometimes.
Please confirm the wire connection referring a manual of target equipments.

case of DB9[DCE](use Cat5 straight cable and NS-354 connector)

In the case of connecting NS-2250 with equipments using DB9[DCE] port as the console port, please use Cat5 straight cable and NS-354 connector.
Depending on a pin assignment of target equipments, you can't use the above combination sometimes.
Please confirm the wire connection referring a manual of target equipments.
