Introducing SmartJumper: Streamlined Access Management Solution for IT Systems

Chiba, Japan – Seiko Solutions Inc. (President: Jun Sekine) proudly unveils "SmartJumper," a user-friendly access management software designed to simplify network operation environments. Beginning September 2023, monthly licenses for SmartJumper will be available in Japan*.

SmartJumper offers secure access management with an emphasis on simplicity and intuitiveness for servers and network devices. Operating within a container, it facilitates centralized access management for IT devices, positioning itself between operators and managed devices.

Featuring a WebGUI, SmartJumper ensures ease of operation while enhancing security by automatically recording "when," "who," "where" accessed, and "what" was performed, ensuring rapid failure recovery for services and enhancing security.

SEIKO

Seiko Solutions has a strong track record of delivering network operation solutions, notably the console server "SmartCS," trusted by major carriers and service providers in Japan. With the evolving complexity of IT equipment configurations to support diverse service offerings, customers face daily challenges in optimizing operational environments for stable, high-quality services.

SmartJumper addresses these challenges by offering seamless integration and providing an effortless, secure operating environment without burdening system operators unnecessarily. Its three-tier licensing system allows for cost optimization based on the scale of managed devices. Moreover, Seiko Solutions plans to continuously enhance SmartJumper's functionality to integrate with the "SmartCS" and external tools in the future.

Seiko Solutions remains committed to enhancing IT infrastructure operability to effectively support customer businesses through network operations solutions.

SmartJumper License System

	Number of Licenses	Target Devices to be managed with IP
Light	100	SmartCS and devices connected to SmartCS
Standard	500	Servers and network devices in addition to the above
Max	10000	All devices on the network
